

Please dont do away with the code. This will only turn our hf freq's into a cb sewer pot. All one needs to do is listen to our 2 meter band. It sounds like the new cb freeband. These folks will not listen to us older hams they are unelmerable. Please look at 11 meters after the fcc pulled away from it. Please dont turn the rest of these type loose on our hf freq's. Please keep cw or if anything increase the requirement.

Thanks

John WR8D
